

RE: Xm radio traffic and whether,  
In response to the petition to stop traffic and whether, I can assure you that  
It would make a significant inconvenience in my work. I rely on XM Radio to keep  
me informed on whether and driving conditions. In many areas of the United  
States. The protesting parties need to realize that local traffic and whether  
reports have always been impossible to find on local stations and when you do  
find them it it's too late. This is an extremely beneficial service to XM  
Subscribers, my spouse, son and myself included; we are paying for this service  
and are entitled to it. The NAB'S petition against XM Radio is a bogus and non  
productive venture. Find something productive to do..  
XM Radio Did.

Sincerely, Michael Horn
